

International Student Policy

Rationale:

Lincoln High School is committed to providing a quality programme that ensures the safety, wellbeing and academic success for all International Students studying at the school.

International Student at any time, means a person who is not then a domestic student. Although deemed domestic, exchange students, students whose parents may be studying a PHD or on a work visa, and permanent residents who have recently arrived in this country, and whose level of English means they are not able to work independently in a classroom situation, may come under the umbrella of the International Department.

Guidelines:

1. To promote international understanding and enhance the multi-cultural dimension of our school
2. To provide a supportive atmosphere and environment for international students both in the learning environment and the home situation
3. To provide quality education for international students with extra support, as appropriate, to enable them to achieve maximum academic success
4. To ensure the enrolment system is suitable to the needs of Lincoln High School and international students
5. To develop appropriate staffing practices to cater for international students
6. To provide firm guidelines on matters of pastoral care for international students
7. To ensure provision of economic support for the school and its community
8. To recruit students actively by promoting Lincoln High School on the international market
9. To meet with the NZQA's Education (Pastoral Care of International Students) Code of Practice 2016 requirements.
